Using Robotics Competition to Improve Classroom Outcomes

Speaker: Greg King

A discussion of how robotics and other similar technical competitions can be used to improve the quality of instruction in STEM classrooms and better prepare students to pursue STEM careers.

About the Presenter:

King's undergraduate education was at Oberlin College and graduate studies at Case Western Reserve University and the Ohio State University. He has been a teacher since 1993, with eight years in the Cincinnati City Schools and 15 years in the Dublin City Schools. He has been working with FIRST programs since 2000, and with the Dublin City Schools FIRST Robotics team since 2003. He currently teaches math, computer science, and engineering at Dublin Coffman High School where he also coaches the FIRST Robotics team, the cross-country team, and the track & field team.
