

Four-Year BSN Program

Bachelor of Science in Nursing Program

The Wittenberg 4-Year BSN program is for students who are not yet registered nurses.

Wittenberg University offers a rigorous four-year program through which students earn the Wittenberg Bachelor of Science in Nursing (BSN) degree and prepare to take the national registered nursing licensure exam (NCLEX-RN). Students reap the benefits of strong liberal arts and professional education experiences while participating in all facets of traditional university student life.

During all four years you are a Wittenberg student, you will have full access to Wittenberg's campus and Wittenberg's support services, and the ability to fully participate in Wittenberg student life including athletics. Upon admission to Wittenberg you will be a Pre-Nursing student with progression to the Nursing major your Sophomore year if all course and GPA requirements are achieved your first year.

Placement

Wittenberg BSN graduates understand contemporary health and illness challenges. They have the skills to manage healthcare for individuals, families, communities and populations across the life span. Since most employers require the BSN at hire or shortly thereafter. Wittenberg graduates are well-prepared to secure employment and pursue graduate education in nursing.

Sample 4-Year BSN Curriculum

Each nursing course is prerequisite for subsequent nursing courses. Students must achieve a 77% exam average in each nursing course to progress. Nursing courses may be repeated only once. Nursing course theory, lab and clinical credits and clock hours are below.

Degree

Research shows that patient outcomes are significantly improved when they receive care from registered nurses who have higher levels of education. The BSN degree is preferred or required at hire by most employers.

Contact Information

If you have questions or would like to schedule a campus visit, contact the Nursing Department at 937-327-7382 or nursing@wittenberg.edu
