

Office of the Registrar

Cultures & Language Across the Curriculum (CLAC) Request Form

Selected courses in several disciplines present students the opportunity to do additional research in a second language and earn 1 credit for that work. Students will work with a faculty member in the Language Department to design and complete a project that supports learning in the course offering the CLAC option. Students must register both for a course offering the CLAC option and for the CLAC module. Students assessed at the intermediate level of language competency may register for a 270 module; students with advanced skills may register for a 370 module. Prerequisite: A language course numbered 150 or above and concurrent enrollment in a non-language course offering the Cultures and Languages Across the Curriculum option.

Submit completed form to the Registrar's Office at Recitation 21 or email to registrar@wittenberg.edu.
